

# PERMAFLOW®

## GUTTER PROTECTION

**MAKE LIFE EASY WITH A  
GUTTER GUARD SYSTEM THAT  
WORKS. GUARANTEED.**

### DEBRIS SHEDDING DOMES

Raised domes allow leaves and pine needles to dry and blow away more quickly than conventional flat gutter guards.

### FAST DRAINING WATER OPENINGS

Don't worry about heavy downpours. Perma Flow can handle almost any amount of rainfall.\*

\*Based on 13" per hour water drain test.

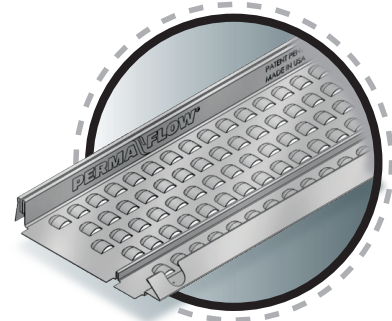

### DURABLE & LONG LASTING

Perma Flow is made using outdoor grade aluminum and comes with a 10-year free-flowing gutter guarantee.

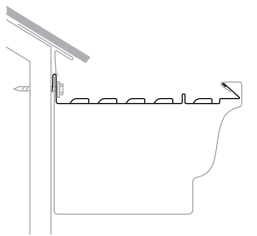

### EASY TO INSTALL

Factory-drilled mounting holes make this an easy job with a power screwdriver.

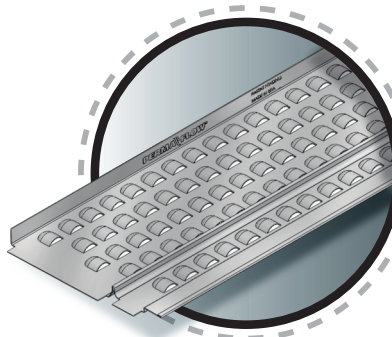

### 5" GUTTER HANGING SYSTEM

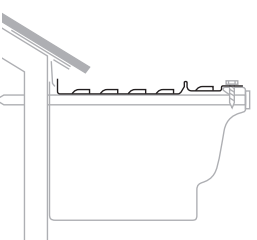

The front edge of the guard clips securely to the underside of 5" K-Style gutters. The back edge then snaps over the back wall of the gutter, creating an easy-to-handle box-section.

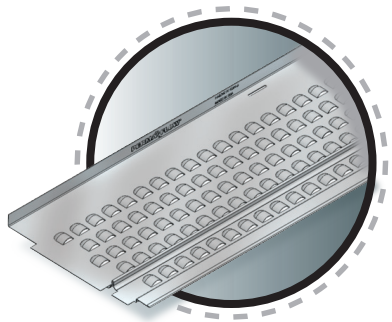

### 5" RETROFIT COVER for K-style Gutters

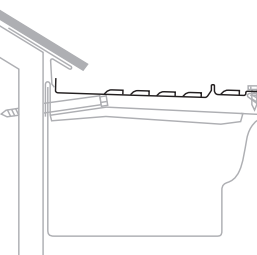

Each 8' guard section rests on top of the gutter hanger and is secured using 1/2" metal gutter screws that are included in each carton.

### 6" RETROFIT COVER for K-style Gutters

Perma Flow Retrofit cover works equally well on concealed hangers as well as spike and ferrule systems.
